

LifeBelts

RULES TO LIVE BY

H&P LifeBelts highlight simple actions that individuals must take to protect themselves and others from serious injury or fatality (SIF).

LifeBelts create awareness and accountability for behaviors that may cause fatal, life-threatening or life-altering injuries.

USE ELECTRONIC DEVICES, INCLUDING CELL PHONES, ONLY AS APPROVED

Electronic devices present an exposure as a distraction and as an ignition source.

MAINTAIN 100% TIE OFF WHEN WORKING AT HEIGHTS

Fall protection separates you from exposures of a fall.

SAFELY OPERATE ALL VEHICLES

Vehicle incidents are the number one exposure to employees. Seat belts save lives.

USE SAFE WORK PRACTICES WHEN HANDLING TUBULARS

Every time we drop a tubular—it can cost someone their life.

LOCK OUT/TAG OUT/TRY OUT TO ISOLATE ENERGY SOURCES

Isolation separates you from the exposures of energy sources.

KEEP OUT OF THE PATH OF MOVING EQUIPMENT

Equipment can move or change position unexpectedly.

PERFORM PRE-JOB PLANNING TO CONTROL AND REMOVE SIF EXPOSURES

Pre-Job planning tools have been created through years of experience by teams who understand the exposures of the job.

SECURE AND INSPECT EQUIPMENT TO PREVENT DROPPED OBJECTS

Inspections help identify overhead exposures before they become dropped objects.

ESTABLISH AND HONOR BUFFER ZONES AND BARRICADES

Buffer zones and barricades are created and enforced to restrict access to areas with SIF exposures.

USE A PERMIT TO WORK WHEN REQUIRED

Work planning and authorization is critical for non-routine tasks with unique SIF exposures.

All personnel on H&P worksites have the authority and obligation to stop unsafe work practices resulting from failure to follow LifeBelts. Stop the job when you see anything unsafe.

These LifeBelts apply to all H&P employees, contractors and vendors. For additional information about H&P LifeBelts, consult your supervisor, superintendent or HSE staff.
